

Bird Graph

Endangered or Threatened Species by Habitat

This graph shows the percentage of bird species that are threatened or endangered and the percentage that scientists believe may need extra protection in different areas. Look carefully at the graph and answer the questions below.

1. Which habitat has the greatest percentage of bird species that are “federally threatened or endangered”?

2. Which type of habitat has the lowest total percentage of bird species that are threatened or endangered or “of conservation concern”? _____
3. In which types of habitat are more than 30% of the bird species endangered, threatened, or of conservation concern?

4. Which type of habitat has the highest percentage of bird species that are of conservation concern?

5. About what percentage of bird species in grassland habitats are federally threatened or endangered?
